

## **SolEarn White PaperVersion 1.1**

**August 2025**

### **TOKONOMICS:**

**1,000,000,000 One Billion Supply**

**5% Tax all transactions**

**50% back to the holders in Solana every 15 minutes**

**50% developer for boosts/trending/promotions**

SolEarn is an innovative revenue-sharing token built on the Solana blockchain, leveraging the Revshare platform to deliver passive income to holders through a unique tax redistribution model.

By combining low transaction taxes, automatic reward distribution, and a strategic roadmap for a trilogy of tokens, SolEarn offers a compelling opportunity for investors seeking exposure to blue-chip cryptocurrencies like Solana (SOL), Ethereum (ETH), and Wrapped Bitcoin (WBTC).

This white paper outlines the vision, mechanics, tokenomics, and future plans for SolEarn and its ecosystem, designed to reward loyalty and foster long-term wealth creation.

1. **Introduction:** The cryptocurrency market is poised for significant growth, with blockchain technologies like Solana offering unparalleled speed, scalability, and cost-efficiency. SolEarn capitalizes on these strengths to create a token that rewards holders with passive income in high-value cryptocurrencies. Built on the Revshare platform, SolEarn introduces a sustainable revenue-sharing model that benefits both holders and developers without requiring token sales for project funding. This white paper details the SolEarn ecosystem, its tokenomics, and its roadmap for expansion into a trilogy of interconnected tokens.

2. **What is SolEarn?**

SolEarn is a native token on the Solana blockchain, designed to provide holders with passive income through a low-tax, high-reward system. By leveraging the Revshare platform, SolEarn redistributes transaction taxes as Solana (SOL) airdrops to holders every 15 minutes, ensuring a seamless and automated reward process.

The token's low tax rate encourages trading volume, which in turn increases rewards for holders, creating a virtuous cycle of liquidity and profitability.

**Key Features Passive Income:** Holders receive Solana rewards proportional to their holdings, automatically airdropped every 15 minutes.

**Low Tax Rate:** A 5% transaction tax ensures tradability while funding rewards and development.

**Developer Alignment:** 50% of taxes support project growth, eliminating the need for developer token sales.

**Scalable Ecosystem:** SolEarn is the first in a planned trilogy of tokens, with future tokens rewarding holders in ETH and WBTC.

**3. Tokenomics**  
**3.1 Tax Structure** SolEarn implements a 5% transaction tax on all buy and sell transactions. This tax is split as follows:  
50% to Holders: Distributed as Solana (SOL) rewards, airdropped to holders every 15 minutes based on their proportional holdings.

50% to Development: Allocated to the project team for marketing, partnerships, listings, and ecosystem expansion.

The low tax rate is designed to maintain high tradability, encouraging trading volume that amplifies rewards for holders.

**3.2 Reward Distribution** The Revshare platform automates the reward process through a sophisticated bot that: Collects SolEarn tokens from transaction taxes.

Converts these tokens to Solana (SOL) on decentralized exchanges.

Distributes SOL to holders' wallets every 15 minutes.

This fully automated system requires no staking or manual claiming, ensuring a frictionless user experience.

**3.3 Supply and Allocation** While the total supply of SolEarn is not specified in this initial white paper, it is designed to support a scalable ecosystem. Future updates will provide detailed supply metrics and distribution plans to ensure transparency.  
**4. The SolEarn Ecosystem: A Trilogy of Tokens** SolEarn is the cornerstone of a three-token ecosystem, each designed to reward holders with passive income in leading cryptocurrencies.

The roadmap includes:

**4.1 SolEarn Launch Phase:** Currently active, rewarding holders with SOL airdrops.

**Stabilization Target:** Market capitalization of \$500,000 to \$1,000,000.

**Utility:** Passive SOL income and eligibility for loyalty rewards in subsequent token launches.

**4.2 EthEarn Launch Trigger:** To be launched upon SolEarn reaching its stabilization target.

Reward Structure: Mirrors SolEarn's tokenomics, distributing Ethereum (ETH) rewards to holders.

Loyalty Bonus: The top 10 SolEarn holders (owning  $\geq 1\%$  of supply and never selling) will receive 2.5 million EthEarn tokens each, totalling 2.5% of the EthEarn supply.

**4.3 BtcEarn Launch Trigger:** To be launched upon EthEarn reaching a market capitalization of \$500,000 to \$1,000,000.

Reward Structure: Distributes Wrapped Bitcoin (WBTC) rewards to holders.

Loyalty Bonus: The top 10 EthEarn holders (owning  $\geq 1\%$  of supply and never selling) will receive 2.5 million BtcEarn tokens each. Holders who also qualify as top 10 SolEarn holders (never selling either token) will receive an additional 2.5 million BtcEarn tokens, totaling 5 million tokens (0.5% of supply).

This loyalty program incentivizes long-term holding and strengthens community trust by rewarding commitment to the ecosystem.

**5. Technical Architecture** SolEarn is built on the Solana blockchain, leveraging its high throughput, low transaction costs, and robust ecosystem. The Revshare platform provides the infrastructure for tax collection and reward distribution, ensuring efficiency and transparency. Key technical components include: Smart Contracts: Govern tax collection and reward allocation, audited for security (audit details to be provided in future updates).

Revshare Bot: Automates token-to-SOL conversion and airdrop distribution every 15 minutes.

Wallet Integration: Compatible with Solana-compatible wallets, requiring no additional setup for reward receipt.

## **6. Benefits for Holders**

SolEarn offers a unique value proposition for investors :Passive Income: Earn SOL, ETH, and WBTC without staking or manual intervention.

Loyalty Rewards: Exclusive airdrops for top holders, enhancing long-term value.

Scalable Returns: Higher trading volume increases reward payouts, benefiting all holders.

Blue-Chip Exposure: Accumulate leading cryptocurrencies during market uptrends, positioning holders for future wealth.

**7. Roadmap Phase 1: SolEarn Launch (Q3 2025)**Token deployment on Solana via Revshare platform.

Community building through Telegram and X.

Marketing campaigns to drive adoption and trading volume.

Website launch with detailed project information.

**Phase 2: SolEarn Stabilization (Q4 2025)**Achieve market capitalization of \$500,000 to \$1,000,000.

Conduct smart contract audits and publish results.

Launch EthEarn token and distribute loyalty airdrops.

**Phase 3: EthEarn and BtcEarn Launch** EthEarn upon SolEarn stabilization.

Achieve EthEarn market capitalization of \$500,000 to \$1,000,000.

Launch BtcEarn and distribute loyalty airdrops.

Explore additional utilities, such as DeFi integrations or governance features.

**8. Risks and Considerations** Investing in cryptocurrencies involves inherent risks, including: Market Volatility: Token prices may fluctuate significantly.

Regulatory Uncertainty: Changes in regulations could impact token operations.

Technical Risks: Smart contract vulnerabilities or blockchain issues, mitigated through audits and robust development practices.

Liquidity Dependence: Reward payouts depend on trading volume, which may vary.

The SolEarn team is committed to transparency, regular updates, and community engagement to address these risks.9. Community and CommunicationJoin the SolEarn community to stay informed and participate in the ecosystem:

**Telegram:** <https://t.me/SolEarnRewards>

**X:** <https://x.com/SolEarnGroup>

**Website: Coming soon**

We encourage feedback and active participation to shape the future of SolEarn.<sup>10</sup>

**Conclusion:**

SolEarn represents a new paradigm in revenue-sharing tokens, combining the power of Solana's blockchain with the innovative Revshare platform. By offering passive income in SOL, ETH, and WBTC, alongside a loyalty-driven roadmap, SolEarn empowers investors to build wealth in the cryptocurrency market. Join us on this journey to redefine passive income in DeFi. Disclaimer: This white paper is for informational purposes only and does not constitute financial advice.
